

QUICK 3 STEP GUIDE TO RECEIVING DIGITAL TERRESTRIAL TV ON THE MOVE

PLEASE USE THIS DIAGRAM AS A GENERAL GUIDE. ALL OF OUR PRODUCTS INCLUDE FULLY ILLUSTRATED INSTALLATION AND DETAILED USER INSTRUCTIONS

1. **FIRSTLY, DECIDE WHAT TYPE OF AERIAL YOU PREFER. OUTDOOR OMNI-DIRECTIONAL, DIRECTIONAL OR INDOOR AERIALS ARE AVAILABLE (ALL OF OUR AERIALS ARE DIGITAL COMPATIBLE). IF YOU CHOOSE TO HAVE AN OUTDOOR AERIAL THEN DECIDE ON A SUITABLE LOCATION TO FIX THE AERIAL. THERE ARE VARIOUS MOUNTS AND MASTS AVAILABLE DEPENDING ON WHICH TYPE OF AERIAL YOU HAVE.**
2. **ROUTE COAXIAL CABLE INTO YOUR VEHICLE USING OPTIONAL CABLE ENTRY ACCESSORIES AND CONNECT TO A COMPATIBLE DIGITAL RECEIVER BOX. THEN SIMPLY PLUG THE RECEIVER BOX INTO YOUR TV USING A SCART TO SCART LEAD.**
3. **FINALLY LOCATE AND CAREFULLY TUNE INTO YOUR CHOSEN LOCAL TV TRANSMITTER. (NOTE THIS ACTION ONLY APPLIES TO DIRECTIONAL AERIALS) A 12V/24V SIGNAL BOOSTER MAY BE REQUIRED IF YOU ARE IN A POOR SIGNAL COVERAGE AREA. TIP, LOOK AT OTHER AERIALS IN THE AREA TO SEE WHICH DIRECTION THEY ARE POINTING FOR BEST RECEPTION.**
