

Product Summary

The Sat Finder I.D aids the dish alignment process when using a manual satellite system, providing visual indication of signal strength and proximity to satellites with an LED to indicate correct satellite alignment.

Key Features

Signal Finder

Provides visual indication of signal strength and proximity to satellites, overcoming the need to view a TV during the alignment process.

Satellite Identification

LED activated when the user locates the desired satellite, consequently overcoming any chance of incorrect alignment.

Sat Finder Adjustment

Enables fine tuning to maximise signal strength and achieve perfect alignment.

Features

- Can be wall mounted using the supplied fixings
- High quality, durable and robust construction

- Designed and manufactured in the UK
- 1 year guarantee

Note: The Sat Finder ID unit is not weatherproof
